

## IMPORTANT AEROSPACE ENGINEERING TIPS & NOTES

### CHECK SHEET

- 1) Follow the Check Sheet – it's carefully organized to assure prerequisites/corequisites are not missed and that you progress towards graduation quickly (129 credit hours are needed to graduate)
- 2) Follow the Check Sheet – missed prerequisites or corequisites for a Fall or Spring only class will result in, at least, a year's delay in graduation (exceptions for missed prerequisites are not granted)
- 3) The handy diagram, or flow chart, below shows how and when classes (e.g., prerequisites/corequisites) connect
- 4) Take your Technical Electives during your senior year, only after carefully considering career goals and consulting with your faculty advisor
- 5) Taking summer classes (especially GE's) is a great way to lighten the
