## +/- Survey Results: 2008

There were 173 respondents, over a third of the total faculty. Although there are strong opinions on each side, a clear majority is in favor of adopting a +/- grading system. The Senate is not bound by the results of the survey and may make any decision it wishes regarding the structure of a plus/minus grading system and whether or not it ought to be adopted.

The detailed results are interesting. The "favored" results are as follows

Adopt plus/minus [53% yes, 32% no, 6% don't care and 9% undecided]

Count grade points to one decimal place [57% yes; 43% two decimals]

No A+ [46% don't include A+, 40% include A+ and 14% undecided]

If A+, then it counts for only 4.0 [54%]

Plus/Minus all the way down to D [36%; next highest was "no D+ and" D

## Faculty Comments from the +/-Survey 2008

"Plus/minus grading will be an effective tool for instructors to motivate students to work harder, and it will also be fairer. I am strongly in favor of this proposal."

"I think plus-minus grading is a mistake and will create many headaches. In most cases it would be a greater degree of precision than the accuracy of the data allows. If the students (still) wanted it, I would not mind as much. But they do not. If it is mandatory I foresee a huge increase in grade complaints."

I very much oppose any plus/minus system.

I think our students deserve to have the plus/minus system to help them in their search for higher quality jobs and further studies.

"The usual system of pluses and minuses would greatly aid in describing the nuances of student performance. As it is, the system at WSU greatly contributes to grade inflation. Grading is a limited tool. A plus and minus system would make it more versatile and useful. Please realize that the most progressive schools have moved beyond grading and use instead narrative evaluations. It is very clear that the WSU population is not ready for that step, since it would require a more enlightened approach to learning which is nowhere evident here. In sum, the proposed change of adding more nuance to the grading system is a step in the right direction, but only a step. More should be done to educate students, staff and faculty about the real nature of evaluation. This is nothing short of a notional revolution at WSU."

I like the plus/minus system because it allows for more precise measurement.

"Coming from a school which used plus/minus grading, I have had a very hard time adjusting. I think the plus/minus system is fairer to the students and gives professors more options."

I think this is a great idea and hope that it becomes an option.

I don't see how +/- grades can hurt if you leave it up to individual professors.

" +/- grading will be fairer, as it is .5(e)0.Tc ( f)2.6, alnesgin, agiaCioest iil4(p9( i)7.6(f)9.6( y

"There should be a way for superior students to be rewarded for 4.0 (or 100-percent plus) work, and that is why the A+ is needed. The simpler scale mentioned as the second option is much easier on both teachers and student

I am very strongly in favor of this proposal and the flexibility it allows. good job with creating the survey questions.

"The introduction of +, - grading system will lead to a serious confusion and grade inflation."

"I support the plus/minus grading system, not because of philosophical arguments about objectivity or accuracy of grading, but because 80% of Carnegie Research institutions use it, KU and K. State use it, and because I think it's healthy for WSU to join the rest of the nation rather than running to the barricades to prevent changes from happening that are far overdue. I think it's important to communicate to the student body (at least those for whom the grading scale may be a burning issue) that it's not ""okay"" to be so involved in extrac

"This is about the third or fourth time Senate has investigated this since I have been here. Using technology to get input from faculty, however, is a first. Good luck."  
"I think we should not spend time and energy on unimportant questions like this one."

I think there is little value to be added to the change in the grading system by implementing this process. Will the grades better reflect what our students know? Will it affect their ability to get jobs? I doubt it.  
Why not just use the percentages directly?

## Comments from the Senate Meeting March 10, 2008

X/F Grading	--- Senate should stay aggressive on this matter, if Univ. Couns has a concern he should address the senate as a whole
Faculty Search	Loose candidates because of the system prevents timely notific
Faculty Development	Need to reinstate International Travel \$ and more funding for Research
Tuition Assistance	Need Administration to substantially contribute Foundation has the funds Foundation has 17 million
Faculty line	As faculty leave, the line needs to be used to hire new faculty often the chairs not even consulted when the line is taken away More equalizing between funding for big/small department/programs
DSI	Senate has felt this is of questionable academic merit Faculty should re-consider the faculty controlled funds that are awarded to runners up
Grievance	Need ombudsman/mediator Need data/records for, (b) grievance topic/ outcome etc
Faculty Workload	Move from 4040-20 to something more reflective of files assumed by Faculty with heavy service commitments.
Service award	There should be a \$\$ award for Service and there is for teaching/research
Blogs	President / Provost must have
College of Fine Arts	Matrix/Merit evaluation in light of WSU becoming Resch Inst. – some disciplines have MFA as terminal degree Questions of validity of creative activity on local, natins and international levels. Lack of technology support across the board for ALL faculty
Plagiarism	Should move to understand why it is common among students and how to effectively screen for it
Shocknet	What will replace it – faculty use black board at home and need something like it
Senate	Lots of wheel spinning concern with only small issues More face to face discussion with Provost etc More “Business “meeting structure Written reports from President Proposals—submit written proposal with recommendations followed by brief discussion/questions and then VOTE Have EXC serve as liason between Administration & Faculty Communications/update all colleges to ensure appropriate policy awareness/compliance, eg SPTE and External reviews

Need data/records for (a) searched # interviewed, (b) grievances –topic outcome&(c) policies topic who proposed, implemented etc.

Re-consider 75 day semester
