

1. Departmental purpose and relationship to the University mission:

a. Departmental Purpose:

The Department of Health Sciences is committed to providing quality education and research opportunities that prepare students for professional practice in the field of healthcare. We strive to provide a comprehensive educational experience that includes theoretical knowledge, practical skills, and clinical experiences. Our goal is to produce healthcare professionals who are compassionate, competent, and ethical.

b. Program Mission:

The mission of the Department of Health Sciences is to provide quality education and research opportunities that prepare students for professional practice in the field of healthcare.

Program Objectives:

To provide students with the knowledge and skills necessary to succeed in their chosen healthcare career.

To prepare students for professional practice in healthcare settings.

To promote research and scholarly activities in the field of healthcare.

To facilitate the development of healthcare professionals who are compassionate, competent, and ethical.

To provide students with the opportunity to engage in applied learning experiences.

To provide students with the opportunity to engage in clinical experiences.

To provide students with the opportunity to engage in research experiences.

To provide students with the opportunity to engage in professional development activities.

To provide students with the opportunity to engage in community service activities.

To provide students with the opportunity to engage in international experiences.

To provide students with the opportunity to engage in experiential learning activities.

To provide students with the opportunity to engage in clinical experiences.

To provide students with the opportunity to engage in research experiences.

To provide students with the opportunity to engage in professional development activities.

To provide students with the opportunity to engage in community service activities.

To provide students with the opportunity to engage in international experiences.

To provide students with the opportunity to engage in experiential learning activities.

To provide students with the opportunity to engage in clinical experiences.

To provide students with the opportunity to engage in research experiences.

To provide students with the opportunity to engage in professional development activities.

To provide students with the opportunity to engage in community service activities.

To provide students with the opportunity to engage in international experiences.

To provide students with the opportunity to engage in experiential learning activities.

To provide students with the opportunity to engage in clinical experiences.

To provide students with the opportunity to engage in research experiences.

To provide students with the opportunity to engage in professional development activities.

To provide students with the opportunity to engage in community service activities.

To provide students with the opportunity to engage in international experiences.

To provide students with the opportunity to engage in experiential learning activities.

education. It's a wonderful educational opportunity for our students to learn about the world around them.

... I think it's important for them to have opportunities to learn about different cultures and different ways of life. It's important for them to understand that there are many different ways of life in the world.

From *Parent* the change starts here.

"The first step towards changing the world is changing yourself."

... I think it's important for our students to learn about different cultures and different ways of life. It's important for them to understand that there are many different ways of life in the world.

a.' Provide aggregated data on tissue and molecular levels.

programs/departments with courses with co-requisites or enrollment courses listed in your cv). provide the following information:
Provide information here. Program outcomes are not offered by this program.

During the past year, we have conducted many informational sessions for prospective students. These sessions have been well received by our prospective students and their parents. We have also developed a new website for our prospective students, which includes information about our programs, faculty, and facilities.

We are currently working on developing a new admissions process for our prospective students. This process will include a more comprehensive evaluation of each applicant's academic record, extracurricular activities, and personal characteristics. We believe that this process will help us to identify the most qualified applicants for our program.

We are also working on developing a new admissions process for our prospective students. This process will include a more comprehensive evaluation of each applicant's academic record, extracurricular activities, and personal characteristics. We believe that this process will help us to identify the most qualified applicants for our program.

The enrollment of our prospective students has increased significantly over the past year. This is due to the fact that we have developed a more effective admissions process, which has resulted in a higher acceptance rate for our prospective students.

All faculty members of the medical laboratory sciences program serve on department admissions, scholarship, and

curriculum committees, and all faculty members are involved in the professional activities of the department. Faculty members also serve on the faculty committee of the college of health professions, the college of professional studies, and the college of nursing.

C. Report on the Program's Activities and Objectives

Four new students were admitted to the program during the fall semester of 1997. We are currently recommending four students for graduation from the program. The following recommendations are based on the recommendations of the faculty members of the program:

recommendations based on information gathered from the students, faculty members, and administration. The recommendations are based on the following criteria listed in section I, identifying three goals for the program to be accomplished in the next three years:

- a. To increase the number of students admitted to the program.
- b. To increase the number of students graduated from the program.
- c. To increase the number of students employed in the field of medical laboratory sciences.

Faculty

- a. To increase the number of students admitted to the program.
- b. To increase the number of students graduated from the program.
- c. To increase the number of students employed in the field of medical laboratory sciences.

Costs

There are many costs associated with the implementation of the new curriculum. These include the cost of new equipment, the cost of training staff, the cost of purchasing new materials, and the cost of re-servicing existing equipment. The cost of training staff will be the most significant, as it will require a significant amount of time and resources to ensure that changes needed can be made in teaching assignments. At present, tenured faculty are not required to take part in the training process, which means that they will not be able to benefit from the new curriculum. This is a concern, as it may lead to a lack of buy-in from the faculty members, which could result in a slower implementation of the new curriculum.

Plan/Goals:

1. Adjust teaching methods to reflect the new curriculum. This will involve changing the way that students are taught, as well as the way that they are assessed. This will require a significant amount of time and resources to ensure that the new curriculum is implemented effectively.
2. Purchase new equipment and learning experience to support the new curriculum. This will involve investing in new equipment, such as computers and software, as well as purchasing new materials, such as textbooks and worksheets.
